

(1)

1. **What is a primary function of spreadsheet software?**
A. creating and editing text documents
B. Creating and editing images and graphics
C. **Creating and managing numerical data and calculations**
D. Designing presentations
2. **An excel workbook is a collection of ?**
A. Workbook B. Work Sheets C. Charts **D. Worksheet and Chart**
3. **Which effect we see as the slides of a PowerPoint changes over**
A. Animation B. Timing C. Effect **D. Transition**
4. **In Excel, What does the term "Data validation" refer to?**
A. Checking for errors in formulas
B. Ensuring data accuracy through validation rules
C. Protection data from unauthorized access
D. Shorting data in ascending order
5. **In Excel, what does the function COUNTA () do?**
A. Counts the number of cells in a range that are not blank
B. Counts the number of cells in a range that are greater than zero
C. Counts the number of cells in a range that contain text
D. Counts the total number of cells in a range
6. **In Excel, what happens when you click on CTRL + X after selecting some cells in Excel?**
A, The cell content of selected cells disappears from cell and stored in clipboard
B. Value in the cells selected are marked for cutting
C. The selected cells are deleted and the cells are shifted left
D. The Selected cells are deleted and cells are shifted Up
7. **The Greater than sign (>) exemplifies a/an ____?**
A. Arithmetic B. Conditional **C. Logical** D. Greater
8. **A saved document is referred to as a ____?**
A. file B. Word C. folder D. Project
9. **Which of the following is considered an output peripheral in a computer system?**
A. Mouse **B. Monitor** C. Hard Drive D. Keyboard
10. **The place where accessories are connected in computer is known as**
A. Port B. Ring C. Bus D. Zip
11. **Which of the following are input devices?**
A. Monitor B. Printer **C. Scanner** D. Plotter
12. **A program that provides software interface to hardware devices is called ____.**
A. System Software B. Application Software **C. Device Drivers** D. All of the Above
13. **A Region of computer memory where frequently accessed data can be stored for rapid asses is called.**
A. Cache B. Token C. Cookie D. Plug-in
14. **The programs which are as permanent as hardware and stored in ROM is known as**
A. Hardware B. Software **C. Firmware** D. ROM ware
15. **Keyboard Converts typed in character to ____ code.**
A. EBCICIC **B. ASCII** C. Decimal D. Binary
16. **You are the new IT admin, and you need to find the network configuration. what should you use?**
A. ipconfig B. cmd C. netchange D. newnet
17. **Office LANS, which are scatted geographically on large scale, can be connected by the use of corporate.**
A. CAN B. DAN C. LAN **D. WAN**
18. **What is the purpose of disaster recovery planning in computer system?**
A. to create regular data backups B. To prevent data loss
C. To ensure business continuity in case of disasters of data loss events
D. To encrypt data
19. **What is not backup in the context of data backup methods?**
A. A backup created while the system is running and fully operational
B. A backup stored in a location with a high temperature
C. A backup stored in the cloud
D. A backup created during system downtime
20. **What is Unicode?**
A. Represents symbol or characters used in any language

- B. Only few languages are supported
D. Characters from A to Z
- C. Supports only few Characters |

21. **The shortcuts that appears on the desktop is called:**

- A. Image B. My Document C. Icon D. My computer

22. **Which of the following is the brain of the operations of a computer**

- A. Central Processing Unit B. Memory C. Arithmetic and logic Unit
D. Control unit

23. **Which of the following is designed to control the operation of a computer?**

- A. User B. Application Software C. System Software D. Utility

24. **Which of the following does computer hardware consist of?**

- A. Storage Devices B. CPU C. I/O Devices D. All of the Above

25. **When you delete a file in your computer, where does it go?**

- A. Recycle bin B. Hard disk C. Taskbar D. None of these

26. **What is Getaway?**

A Gateway is a device that connects two different networks and allows data to flow between them, often between a local network and the internet.

গেটওয়ে হলো এমন একটি ডিভাইস যা দুইটি ভিন্ন নেটওয়ার্ককে সংযুক্ত করে এবং তাদের মধ্যে ডেটার আদান-প্রদান নিশ্চিত করে, সাধারণত একটি লোকাল নেটওয়ার্ক এবং ইন্টারনেটের মধ্যে।

27. **What is DNS?**

DNS translates domain names (like google.com) into IP addresses that computers use to identify each other on the network.

হল একটি সিস্টেম যা ডোমেইন নামকে যেমন **google.com** সংশ্লিষ্ট **IP** ঠিকানায় রূপান্তর করে, যেন কম্পিউটার বা ব্রাউজার সেই ওয়েবসাইটের সংযুক্ত হতে পারে।

28. **What is Firewall?**

A firewall is a security system (hardware or software) that monitors and controls incoming and outgoing network traffic based on predefined security rules.

ফায়ারওয়াল হলো একটি নিরাপত্তা ব্যবস্থা হার্ডওয়্যার বা সফটওয়্যার, যা পূর্ব নির্ধারিত নিয়ম অনুযায়ী নেটওয়ার্কে প্রবেশ এবং বের হওয়া ডেটা পর্যবেক্ষণ ও নিয়ন্ত্রণ করে।

29. **What is Cash memory?**

Cache memory is a small, high-speed memory located close to the CPU that stores frequently accessed data and instructions so the processor can access them faster.

ক্যাশ মেমোরি হলো একটি ছোট ও দ্রুতগতি সম্পন্ন মেমোরি, যা CPU এর খুব কাছাকাছি অবস্থান করে এবং প্রায়শই ব্যবহৃত ডেটা ও নির্দেশাবলি সংরক্ষণ করে।

30. **What is Bandwidth?**

Bandwidth is the maximum amount of data that can be transmitted over a network connection in a given amount of time, usually measured in Mbps or Gbps.

ব্যান্ডউইথ হল নির্দিষ্ট সময়ে একটি নেটওয়ার্ক সংযোগের মাধ্যমে সর্বোচ্চ পরিমাণ ডেটা স্থানান্তরের ক্ষমতা। এটি সাধারণত Mbps (Megabits per second) বা Gbps (Gigabits per second) এ পরিমাপ করা হয়।

(2)

1. Which software is used for creating and delivering visual information through slides?
A. Word Processor B. Spread sheet Software
C. Presentation Software D. Operating System
2. What is the Global network of interconnected computer networks that allows information to be shared?
A. WWW B. URL **C. Internet** D. Web Browser
3. A Mouse, Keyboard, and monitor are examples of computer;
A. Inputs B. Hardware **C. Peripherals** D. Networks
4. The component that serves as the central hub for connecting all other components in a computer the;
A. Processor B. RAM C. Graphics Card **D. Mainboard**
5. What does RAM provide for the computer?
A. Long-term storage
B. Cache memory provides temporary storage for data the CPU is actively using
C. Frist computer Operation Memory
D. High-speed Network connectivity
6. What component is responsible for providing electrical power to the computer's internal parts?
A. Mainboard B. Processor **C. Power supply** D. RAM
7. What is the physical enclosure that holds the computer components?
A. Monitor B. Keyboard **C. Computer Case** D. Printer
8. Which of the following is a crucial step in preparing for OS Installation?
A. Download OS **B. Selecting the Operating System as per requirement**
C. Prepare Flash-drive OS Installation D. Check Existing OS
9. Which of these is a type of firmware interface identified before OS installation?
A. EFT B. GPT **C. UEFI** D. BIOS
10. Which of the following is a partition type used for disk formatting?
A. SSD B. EFI **C. GPT** D. CMOS
11. Which of the following is a type of a transmission media?
A. LAN **B. Wireless** C. DNS D. IP
12. Collecting and documenting organizational requirements for a network setup helps to;
A. Make the network slower **B. Understand the needs and goals for the network design**
C. Increase the cost of the network D. Delete existing data
13. The physical or logical arrangement of devices in a network is called;
A. Network Protocol **B. Network Topology**
C. IP Address D. Sub netmask
14. Why are user requirements documented before collecting software?
A. To decide the computer **B. To ensure the correct software is selected**
C. To Find a new software D. Download and install
15. Taking a necessary backup before installing software is done to;
A. Make the computer faster **B. Protect existing data**
C. Change the screen resolution D. Install more RAM
16. The Process of creating copies of data to prevent loss is called.
A. Data Recovery B. Data analysis **C. backup** D. Data encryption
17. Which of the following is a type of backup scheme?
A. Real-time backup **B. Full Backup** C. Online Backup D. Offline Backup
18. A documented process to recover and restore business functions after a disruptive event is a;
A. Security policy B. Network diagram
C. Online backup D. Offline Backup
19. The First step in preparing for troubleshooting is;
A. Fixing the Problem B. Updating documents
C. Selecting and collecting required tools and equipment
D. Identifying the cause of fault

20. After indemnifying the cause of a fault, you should;
- | | |
|--------------------------------------|---|
| A. Immediately replace the component | B. Perform testing to ensure the cause |
| C. Restart the computer repeatedly | D. Install new software |
21. What is meant by 'workplace code of conduct'?
- Workplace code of conduct means the rules and proper behavior to follow at work.
ওয়ার্কপ্লেস কোড ওফ কনডাক্ট হলো কর্মস্থলের নিয়ম ও শিষ্টাচার।
22. What is the purpose of sorting files and folders?
- To arrange files and folders in a specific order for easy access and better organization.
ফাইল ও ফোল্ডার সাজানোর উদ্দেশ্য হলো সহজে খুঁজে পাওয়া এবং ভালোভাবে সংগঠিত করা।
23. What is the basic process of sending an email?
- The basic process of sending an email is:
1. Composing the email
 2. Adding the recipient's address
 3. Sending through the email server
 4. Recipient receives the email.
24. What is the main goal of IT support service?
- The main goal of IT support service is to quickly and effectively resolve users' technical problems.
আইটি সাপোর্ট সার্ভিসের মূল লক্ষ্য হলো ব্যবহারকারীদের প্রযুক্তিগত সমস্যা দ্রুত ও কার্যকরভাবে সমাধান করা।
25. What is the purpose of an anti-static wrist band?
- An anti-static wristband is used to protect computer hardware from static electricity during repairs or assembly.
অ্যান্টি-স্ট্যাটিক রিস্টব্যান্ড ব্যবহার করা হয় কম্পিউটার হার্ডওয়ারের মেরামতের বা সংযোজনের সময় স্ট্যাটিক বিদ্যুৎ থেকে সুরক্ষা দেয়ার জন্য।
26. What are the two main types of firmware interfaces identified before OS installation?
- The two main types of firmware interfaces identified before OS installation are BIOS and UEFI.
27. What tool is used to verify if a network cable is working correctly?
- A cable tester is used to verify if a network cable is working correctly.
28. What is a Gateway in networking?
- A gateway is a device that helps transfer data between two different networks.
গেটওয়ে হলো একটি ডিভাইস যা দুটি আলাদা নেটওয়ার্কের মধ্যে ডেটা আদানপ্রদান করতে সাহায্য করে।
29. What is the purpose of activating a software license?
- The purpose of activating a software license is to legally validate the software usage and prevent copyright infringement.
সফটওয়্যার লাইসেন্স অ্যাক্টিভেশন করার উদ্দেশ্য হলো সফটওয়্যারটিকে বৈধভাবে ব্যবহার নিশ্চিত করা এবং কপিরাইট লঙ্ঘন রোধ করা।
30. What is the first step in performing an OS backup?
- The first step in performing an OS backup is to create a backup of important data.

(3)

1. Which of these defines the network and host portions of an IP Address?
A. Gateway B. DNS **D. Subnet mask** E. IP Address
2. What is the final step after installing and configuring software?
A. Shutting down the computer
B. Checking the functionality of the installed software
C. Opening the User requirements
D. Changing the Password
3. What is the Unique address of a web page called?
A. Website ETP **B. URL** C. social media D. Web Server
4. Which of the following is the valid host range for the subnet on which IP Address?
A. 190.168.129-190 **B. 190.168.129-191**
C. 190.168.128-190 D. 190.168.128.-192
5. The Topology with highest reliability?
A. Bus Topology **B. Star Topology** C. Ring Topology D. Mesh Topology
6. Which of the following is not a field in the Ethernet Message packet?
A. Type B. Data **C. Pin-code** D. Address
7. Following instruction manuals during installation/upgrade helps to:
A. Cause more errors **B. Ensure correct procedures and avoid damages**
C. Make the procedures and damages D. Reduce the need for drives
8. Software that can help identify and install drivers is referred to as a:
A. Virous Scanner **B. Driver Agent** C. Game Launcher D. Web browser
9. Which one is not computer hardware?
A. Motherboard B. Processor **C. Monitor** D. RAM
10. What is the primary function of a search engine?
A. To find on this application
B. To search information, Google chrome
C. To find one the internet
D. To find information one the computer
11. What is the function of the DNS server?
A. It connects a PC to The router
B. IT Connects domain names to IP Address
C. To stores email addresses
D. It makes the IP Addresses
12. The steps taken to recover data from a backup are called the:
A. Backup Procedure B. Installation Procedure
C. Restore Procedure D. Configuration procedure
13. What is the purpose of an operation system?
A. Top stop user files and managing user hardware
B. To provide a flatform for running applications and managing hardware
C. To operate personal computer for running devices
D. To conned to the internet and access managing
14. A triangle with exclamation mark usually represents:
A. Safe Area B. Instruction Manual
C. Warning or Hazard D. Restroom
15. When installing application software, it should be done according to:
A. Personal preference B. Availability of space
C. Standard procedures D. The software procedures
16. Modifying the boot sequence is necessary to:
A. Increase the computer speed
B. Prioritize the boot media for installation
C. Increase drive speed
D. Install software application
17. Which type of support deals with issues related to computer programs?
A. Hardwar support **B. Software support**
C. Networking support D. Security support
18. Which is typically installed after the operating system?
A. User files **B. Required drivers**
C. More RAM D. New computer case
19. Which of these is a valid source for obtaining drivers?
A. Random websites **B. Vendor site**
C. Software site D. Microsoft

20. The first step in performing an OS backup is to?
 A. Install new software B. Delete old files
 C. Interpret the partition table **D. Run a virus scan**
21. Give two workplace symbols and meanings:
 1. Fire Extinguisher Symbol – Indicates location of fire safety equipment.
 2. No Smoking Symbol – Smoking is prohibited in that area.
22. Give example of excel logic and brief
 Formula: =IF(A1>50, "Pass", "Fail")
 Brief: This checks if the value in cell A1 is greater than 50. If true, it returns "Pass", otherwise "Fail".
23. What is the difference between HDD and SSD?
 HDD (Hard Disk Drive): Uses spinning magnetic disks to store data. Slower, more storage capacity, cheaper.
 HDD (Hard Disk Drive): ঘূর্ণমান ডিস্কের মাধ্যমে ডেটা সংরক্ষণ করে। গতি কম, স্টোরেজ বেশি, দাম কম।
 SSD (Solid State Drive): Uses flash memory. Much faster, more durable, costlier, and uses less power.
 SSD (Solid State Drive): ফ্লাশ মেমোরি ব্যবহার করে। অনেক দ্রুত, টেকসই, দাম বেশি এবং কম বিদ্যুৎ ব্যবহার করে।
24. What is ESD tools?
 ESD tools (Electrostatic Discharge tools) are used to prevent damage to electronic components from static electricity. Common ESD tools include:
 ESD tools (Electrostatic Discharge tools) হলো এমন সরঞ্জাম যা ইলেকট্রনিক যন্ত্রাংশকে স্ট্যাটিক বিদ্যুতের ক্ষতি থেকে রক্ষা করে।
 সাধারণ টুলসের মধ্যে রয়েছে:
 - Anti-static wrist straps
 - Anti-static mats
 - ESD-safe tweezers
 - ESD-safe gloves
25. What is partition table?
 A partition table is a part of a hard disk that stores information about the disk's partitions—how the storage is divided. It tells the operating system where partitions start and end, and what file systems they use.
 পার্টিশন টেবিল হলো হার্ড ডিস্কে এমন একটি অংশ যেখানে ডিস্কের বিভাজনের তথ্য সংরক্ষণ থাকে। এটি অপারেটিং সিস্টেমকে জানায়, পার্টিশন কোথা থেকে শুরু ও শেষ এবং কোন ফাইল সিস্টেম ব্যবহৃত হচ্ছে।
26. What is the difference between static vs dynamic IP:
 - Static IP: A fixed IP address manually assigned to a device. It doesn't change over time.
 - Dynamic IP: An IP address assigned by a DHCP server and can change over time.
 * স্ট্যাটিক আইপি: একটি নির্দিষ্ট আইপি অ্যাড্রেস যা ম্যানুয়ালি ডিভাইসকে দেওয়া হয় এবং এটি পরিবর্তন হয় না।
 * ডায়নামিক আইপি একটি আইপি অ্যাড্রেস যা উইন্ডোজ সার্ভারের মাধ্যমে স্বয়ংক্রিয়ভাবে দেওয়া হয় এবং সময়ের সাথে পরিবর্তন হতে পারে।
27. What is CMOS function?
 CMOS (Complementary Metal-Oxide Semiconductor) stores BIOS settings such as date, time, and hardware configuration. It retains this data using a small battery even when the computer is off.
 CMOS (Complementary Metal-Oxide Semiconductor) BIOS সেটিংস যেমন তারিখ সময় এবং হার্ডওয়্যার কনফিগারেশন সংরক্ষণ করে। এটি একটি ছোট ব্যাটারির মাধ্যমে কম্পিউটার বন্ধ থাকলেও তথ্য ধরে রাখে।
28. What type of software installation needs a user requirement?
 custom installation allows user to choose settings like language, components, and location.
 কাস্টম ইনস্টলেশন ব্যবহারকারীর ভাষা, উপাদান এবং অবস্থান এর মতো সেটিংস বাছাই করতে দেয়।
29. What is common problem solving method in IT system?
 Common problem-solving method in IT systems is Troubleshooting. It involves identifying, diagnosing, and fixing issues step-by-step.
 IT সিস্টেমে সাধারণ সমস্যা সমাধানের পদ্ধতি হলো ট্রাবলশুটিং, যেখানে সমস্যা চিহ্নিত, বিশ্লেষণ এবং ধাপে ধাপে সমাধান করা হয়।

(4)

1. Who can't an appropriate source for working information?
a) **assessor** b) HR Department c) HR Department d) Supervisor
2. Which device Convert Hard Copy to soft copy?
a) **scanner** b) Printer c) Monitor d) Modem
3. The taskbar shows:
a) Recent documents b) **Icons for open applications** c) Page number d) Footnotes
4. Which web browser is develop by Microsoft ?
a) **Microsoft Edge** b) Mozilla Firefox c) Google Chrome d) Opera
5. Which of these is considered a peripheral device?
a) **Mouse** b) CPU c) SSD/HDD d) Ram
6. Which component is considers the brain the computer?
a) Ram b) Power Supply c) Hard Disk d) **CPU**
7. Which of the following is a type of storage device?
a) Sound Card b) Network interface c) **Solid-state-Drive** d) Power Supply
8. which Competent stores the BIOS setting and keeps the real time clock running?
a) Processor b) RAM c) **CMOS Battery** d) Graphics Card
9. Partitioning and formatting the disk during OS installation is done to:
a) Make the computer louder b) Install antivirus software
c) Delete all data presently d) **organize storage space prepare for the OS**
10. Following Instruction manuals during installation / Upgrade Helps to
a) Cause more errors b) **Ensure correct procedures and avoid damage**
c) Make The process more complicated d) Reduce the need for drivers
11. What is Typically installed after the operating system?
a) User files b) **Required drivers** c) More Ram d) New computer case
12. Creating user accounts and settings password is part of:
a) Hardware Installation b) Driver Installation
c) User management d) BIOS configuration
13. What is the primary use of an RJ45 connector?
a) Transmitting electrical power b) **Connecting Ethernet cables**
c) Transmitting internet signals d) Connecting telephone
14. which of these is a possible solution for a network problem?
a) Ignoring the problem b) **Replacing components**
c) Restarting the computer only d) buying a new monitor
15. What happens when two devices on the same network have the same IP address ?
a) Improved network stability b) IP address overloaded and decrees data transfer rates
c) **IP Conflict leading to network issue** d) Data loss will be happened
16. What does DNS stand for?
a) Digital network serves b) **Domain Name System**
c) data Naming trends d) Dynamic network server
17. Before colleting software for installation, it is important to follow :
a) **Occupational Safety and health(OSH) produce** b) social media Trends
c) Marketing strategies d) Fashion guidelines
18. A document process to recover and restore business function after a disruptive event is a:
a) **Disaster recovery plan** B) Network diagram c) Security policy d) Software license
19. The design and structure of an operating system is its:
a) User interface b) File system c) **OS architecture** d) Device driver
20. Before fixing a problem that requires repair or replacement ,what needs to be calculated and approved
a) **The repair or replacement cost** b) The amount of available storage
c) The Computer's speed d) The data of manufacture
21. Write Down two spreadsheet programs.
MS-Excel, Google Sheet
22. Name a Web based service used for creating and editing document online.

Google Docs, Zoho Sheet, Google Sheet.

23. What is the purpose of data center?

A data center is a facility used to house computer systems and related components, such as servers, storage, and networking equipment.

ডাটা সেন্টারের উদ্দেশ্য হলো তথ্য সংরক্ষণ, পরিচালনা ও প্রক্রিয়াজাত করা, যাতে ব্যবসা ও প্রযুক্তিগত সেবা নিরবিচ্ছিন্নভাবে চালু রাখা যায়।

24. What does an AVO meter stand for?

A= Ammeter, V= Volt Meter, O= Ohm Meter

25. What is the benefit of following instruction manuals when installing or upgrading hardware/Software?

to ensure correct procedure are followed and avoid errors or damage. (নিশ্চিত করতে এবং ত্রুটি বা ক্ষতি এড়াতে)

26. What Does WAN stand for?

Wide Area Network

27. What is an IP addressing scheme?

An IP addressing scheme is a structured way of assigning IP addresses to devices on a network.

IP addressing হলো একটি পরিকল্পিত পদ্ধতি যার মাধ্যমে নেটওয়ার্কে থাকা ডিভাইসগুলোকে ওচ অ্যাড্রেস দেওয়া হয়।

28. What type of software is collected based on user requirements?

allows to choose settings like language, components and location. (ব্যবহারকারীর ভাষা, উপাদান এবং অবস্থান এর মতো সেটিংস বাছাই করতে দেয়।)

29. Name one method for creating an email backup plan.

Use Google Takeout to export and back up your emails./ Create automatic email backups using cloud services. ক্লাউড সার্ভিস ব্যবহার করে স্বয়ংক্রিয় ইমেইল ব্যাকআপ তৈরি করা।

30. What is the first step in preparing for troubleshooting?

Identify the problem.

(5)

01. What should be done if a workplace document is difficult to understand?
a) Take assistance from peers/supervisors b) Guess its meaning c) Ignore it d) Avoid reading
02. Workplace code of conduct is guided by:
a) Social media rules **b) Organizational guidelines** c) Local rumors d) Personal preferences
03. What should you do after connecting all peripherals?
a) Gently power on the computer b) Switch on the CPU only
c) Switch on the monitor only d) Immediately start using mouse
04. What is the purpose of the taskbar?
a) Store files **b) Launch applications and show running programs**
c) Format hard drive d) Manage passwords
05. What is the primary function of a search engine?
a) To find information on the internet b) To send emails
c) To display websites d) To download files
06. What is the unique address of a web page called?
a) Information b) Social Media **c) URL** d) Web Server
07. Interpreting IT infrastructure involves understanding:
a) Software Architecture b) Historical events c) Computer Architecture
d) The underling systems and components that support IT operations
08. Identifying the specific problem a user is facing is the initial step in:
a) Delivering solution b) Implementing follow-up
c) Identifying customer issues d) Evaluating support solutions
09. What does GPT stand for in the context of disk partitioning?
a) GUID Partition Table b) General Partition Table
c) GUIDED Partition Table d) Graphics Partition Table
10. Which component on the motherboard is responsible for communication between the CPU, memory, other peripherals?
a) RAM b) BIOS **c) Chipset** d) Hard Drive
11. What should you do before installing or upgrading hardware/software?
a) Read the instruction manual b) Plug in multiple USBs
c) Restart the PC d) Close all running apps
12. Which of the following is a safe practice when working with electronic equipment?
a) Handling with wet hands b) Using metallic tools recklessly
c) Wearing anti-static wristbands d) Keeping devices plugged in during repair
13. A short length of network cable used for connections is a :
a) Backbone cable b) Coaxial cable c) Fiber optic cable **d) Patch cord**
14. Reviewing network documentation during troubleshooting helps to:
a) Install new software **b) Understand the network's configuration and history**
c) Change the computer's color d) Play online games
15. Which of the following is an example of utility software?
a) Anti-virus b) Spreadsheet program c) Word Processor d) Video editing software
16. Which of these is a critical aspect of competency in this topic?
a) Painting the computer case **b) Installing and configuring application software**
c) Building a website d) Playing video games
17. The steps taken to recover data from a backup are called the:
a) Restore procedure b) Installation procedure c) Backup procedure d) Configuration procedure

18. Tools are identified and selected for recovery to :

a) Make the computer faster

b) Ensure the correct software or utility is used to restore the backup

c) Change the desktop background d) Install a new operating system

19. Problems can be detected by:

a) Ignoring the computer

b) Playing games

c) Changing the desktop background

d) Physical observation

20. What is documented after troubleshooting is completed?

a) The user's favorite color

b) Computer maintenance and troubleshooting status

c) The weather conditions

d) The price of the computer

21. Why are brochures used in the workplace?

Brochures are used in the workplace to provide clear and concise information about products, services, or company policies. They help in communication, marketing, and educating employees or customers.

Brochures কাজের জায়গায় তথ্য সহজে ও সংক্ষিপ্তভাবে জানাতে ব্যবহৃত হয়। এটি পণ্য, সেবা বা নীতিমালা বোঝাতে সাহায্য করে

22. What is the first step in turning on a computer?

The first step in turning on a computer is to connect the power supply and then press the power button.

কম্পিউটার চালু করার প্রথম ধাপ হল পাওয়ার সাপ্লাই যুক্ত করা এবং তারপর পাওয়ার বাটন চাপা

23. Which social media Platform is mainly used for Photo sharing?

Instagram is mainly used for photo sharing.

24. What is an example of a computer accessory?

An example of a computer accessory is a mouse or keyboard.

25. What does RAM stand for?

Random Access Memory.

26. What is the first step in preparing for an operating system installation?

back up important data.

27. What is the purpose of a PC internet firewall?

The purpose of a PC internet firewall is to protect the computer from unauthorized access and block harmful traffic from the internet.

PC ইন্টারনেট ফায়ারওয়ালের উদ্দেশ্য হলো অননুমোদিত প্রবেশ প্রতিরোধ করা এবং ক্ষতিকর ইন্টারনেট ট্রাফিক ব্লক করা

28. When is it necessary to take a backup before installing software?

It is necessary to take a backup before installing software when there is a risk of data loss or system failure during installation.

সফটওয়্যার ইনস্টল করার আগে ব্যাকআপ নেওয়া জরুরি হয় যখন ইনস্টলেশনের সময় ডেটা হারানো বা সিস্টেমে সমস্যা হওয়ার সম্ভাবনা থাকে

29. Name one type of backup solution.

One type of backup solution is Full Backup.

30. What is done after repairing or replacing faulty hardware equipment or software components?

After repairing or replacing faulty hardware or software, testing is done to ensure everything works correctly.

ত্রুটিপূর্ণ হার্ডওয়্যার বা সফটওয়্যার মেরামত বা পরিবর্তনের পর সবকিছু সঠিকভাবে কাজ করছে কিনা তা পরীক্ষা করা হয়

(6)

1. What should you do when you don't understand a symbol?
a) Ignore it b) Leave the office c) Break the rule **d) Ask for help**
2. Who can't be an appropriate source for workplace information?
a) HR department b) HR department **c) Assessor** d) Supervisors
3. Which function adds a group of numbers in Excel?
a) AVERAGE **b) SUM** c) MIN d) MAX
4. The taskbar is typically found:
a) At the top of the screen **b) At the bottom of the screen**
c) In the control panel d) Inside the task manager
5. Which web-based service is used for online meetings?
a) Google Slide b) Google Translator c) Google Sheets **d) Google Meet**
6. Which one is not an email service platform?
a) Yahoo b) Outlook **c) Bing** d) Hotmail
7. A device used to connect multiple computers in a network is a:
a) LAN Port b) Anu to Router c) PC to PC **d) Router**
8. Identifying the specific problem a user is facing is the initial step in:
a) Delivering solutions b) Implementing follow -up
c) Identifying customer issues d) Evaluating support solutions
9. Which of the following is a type of personal computer?
a) Laptop b) Server c) Smartphone d) Router
10. Which of the following is a place of Personal Protective Equipment (PPE) used when working with computer components?
a) Safety Goggles b) Apron c) Steel-toed Boots d) Hard Hat
11. Software that can help identify and install drivers is often referred to as a :
a) Virus scanner b) Web browser c) Game Launcher **d) Driver agent**
12. What is typically installed after the operating system?
a) User files **b) Required drivers** c) More RAM d) New computer case.
13. A group of interconnected devices that can communicate with each other is called a:
a) Computer b) Group c) Server **d) Network**
14. The Physical or Logical arrangement of Devices in a network Is called :
A) Network Protocol **b) Network Tropology** C) IP Address D) Sub netmask
15. Which Of The Following is an Example of Utility Software?
A) Anti-Virus B) Spreadsheet Program C) Word Processor D) Video Editing Software
16. Before collecting Software for Installation, it is important to follow:
A) Marketing Strategies B) Social Media trends
C) Occupational Safety and Health (OHS) Procedures D) Fashion guidelines
17. The first Step in Performing backup Recovery is to:
A) Delete the Original Data B) Format The Hard Drive
C) Create a new backup **D) Collect the backup for Recovery**
18. Which of these is a Type of partition table ?
A) NTFS B) FAT32 **C) GPT** D) ext4
19. Interviewing the appropriate person about the problem helps to:
A) Calculate the repair cost B) Order Replacement parts
C) Identify the cause of fault immediately **D) Understand the Problem from the user's perspective**

20. After Repairing or replacing faulty equipment, You should:
 A) Leave The Computer as Is **B) Test the repaired/replaced equipment and pc Performance**
 C) Turn of the Computer permanently D) Give the computer Away
21. Give two examples of workplace symbols and their meanings.
 ⚠ Warning sign → indicates potential danger.
 ⏻ Power symbol → shows power on/off.
22. What is the use of a Drop Cap ?
 Drop Cap: Used to enlarge the first letter of a paragraph for decorative emphasis in documents.
 ড্রপ ক্যাপ: অনুচ্ছেদের প্রথম অক্ষর বড় করতে ব্যবহৃত হয়।
23. What is the purpose of web-based services like Google Calendar?
 Purpose of Google Calendar (web-based services): To schedule, manage, and share events, reminders, and meetings online.
 গুগল ক্যালেন্ডারের উদ্দেশ্য (ওয়েব-ভিত্তিক পরিষেবা): অনলাইনে ইভেন্ট, রিমাইন্ডার এবং মিটিংগুলির সময়সূচী নির্ধারণ, পরিচালনা এবং ভাগ করে নেওয়া।
24. What is customer support service in an IT system?
 Customer support service in IT system: Assistance provided to users for solving technical issues, ensuring system usability and satisfaction.
 আইটি সিস্টেমে গ্রাহক সহায়তা পরিষেবা: ব্যবহারকারীদের প্রযুক্তিগত সমস্যা সমাধান, সিস্টেমের ব্যবহারযোগ্যতা এবং সন্তুষ্টি নিশ্চিত করার জন্য সহায়তা প্রদান করা হয়।
25. What is the National IT Policy?
 National IT Policy: Government strategy to promote ICT growth, digital services, IT education, and economic development through technology.
 জাতীয় তথ্যপ্রযুক্তি নীতি: প্রযুক্তির মাধ্যমে তথ্যপ্রযুক্তি প্রবৃদ্ধি, ডিজিটাল পরিষেবা, তথ্যপ্রযুক্তি শিক্ষা এবং অর্থনৈতিক উন্নয়নের জন্য সরকারি কৌশল।
26. What does MBR stand for the content of partition type?
 MBR: Master Boot Record – contains partition information and bootloader of a storage device.
 MBR: মাস্টার বুট রেকর্ড - এতে একটি স্টোরেজ ডিভাইসের পার্টিশন তথ্য এবং বুটলোডার থাকে।
27. What is a Subnet mask?
 Subnet mask: A numerical label that divides IP addresses into network and host portions, used for routing.
 সাবনেট মাস্ক: একটি সংখ্যাসূচক লেবেল যা আইপি ঠিকানাগুলিকে নেটওয়ার্ক এবং হোস্ট অংশে বিভক্ত করে, যা রাউটিংয়ের জন্য ব্যবহৃত হয়।
28. What type of software is collected based on user requirement?
 Software based on user requirement: Application software (e.g., MS Word, Excel, accounting software).
 ব্যবহারকারীর প্রয়োজনীয়তার উপর ভিত্তি করে তৈরি সফটওয়্যার: অ্যাপ্লিকেশন সফটওয়্যার (যেমন, এমএস ওয়ার্ড, এক্সেল, অ্যাকাউন্টিং সফটওয়্যার)।
29. Name one tool for OS backup
 some tool for OS backup: EaseUS Todo Backup Free, Redo Rescue, Windows Backup and Restore – Built-in tool in Windows OS.
30. Why is it important to interview the appropriate person about problem?
 Importance of interviewing appropriate person: Helps understand the problem from the user's perspective and ensures correct troubleshooting.
 উপযুক্ত ব্যক্তির সাক্ষাৎকার নেওয়ার গুরুত্ব: ব্যবহারকারীর দৃষ্টিকোণ থেকে সমস্যাটি বুঝতে সাহায্য করে এবং সঠিক সমস্যা সমাধান নিশ্চিত করে।

(7)

1. What should you do when you don't understand a symbol?
a. ignore it b. leave the office c. break the rule **d. ask for help**
2. Workplace code of conduct is guided by:
a. Social media rules **b. Organizational guidelines** c. Local rumors d. personal preferences
3. Which of the following is NOT a peripheral device?
a. Monitor b. Mouse c. Keyboard **d. CPU**
4. Which type of software is primarily used for calculations and data analysis cells and rows?
a. Word Processor b. Presentation Software **c. Spreadsheet Software** d. Operating System
5. What is the Unique address of a web page called?
a. URL b. Social Media c. Information d. Web Server
6. What does 'achieving' and email mean?
a. deleting permanently **b. saving it in a separate folder for future refinance**
c. Sending to another recipient d. printing the email
7. Which of these is considered a peripheral device?
a. Mouse b. CPU c. SSD/HDD d. RAM
8. Which of these is a working area of an IT support service?
a. Construction site b. Retail store **c. Data center** d. SFarm
9. Which component is considered the "Brain" of the computer?
a. RAM b. Power Supply c. Hard disk **d. CPU**
10. Which part of the computer supplies power to all components?
a. CPU b. Motherboard c. RAM **d. Power Supply Unit**
11. Following instruction manuals during installation/upgrade helps to:
a. Cause more errors b. Reduce the need for drivers
c. Make the process more complicated **d. Ensure correct procedures and avoid damage**
12. What is the role of user management in operating systems?
a. Installing drivers **b. Creating and managing user accounts and permissions**
c. Displaying images d. Formatting storage
13. What is the primary purpose of documenting a network address plan?
a. To increase network performance
b. To Provide Guidelines for setting up new devices on the network
c. To make the Network more secure
d. To Reduce network downtime and increase network performance
14. A group of interconnected devices that can communicate with each other is called a:
a. Computer **b. Network** c. Server d. Group
15. Before collecting software for installation, it is important to follow:
a. Occupational Safety and Health (OSH) procedures b. Social Media trends
c. marketing strategies d. Fashion Guidelines
16. What types of software are collected based on user requirements?
a. Operating System **b. Application software and utility Software**
c. Drivers only d. Games only
17. Which of the following is a type of backup storage media?
a. External Storage Devices b. Mouse c. Keyboard d. Monitor
18. The design and structure of an operating system is its:
a. User interface b. File System **c. OS Architecture** d. Device driver
19. After identifying the causes of a fault, you should:
a. Immediately replace the component b. Install new software
c. Restart the computer repeatedly **d. Perform testing to ensure the cause**

20. Before fixing a problem that requires repair or replacement, what needs to be calculated and approved?
- a. the computer's speed
 - b. the amount of available storage
 - c. the repair or replacement cost**
 - d. the date of manufacture
21. How should meetings be attended?
- On time and following procedures.
সময়মতো এবং অনুসরণীয় পদ্ধতিতে।
22. What does "Change case" do in MS Word?
- It converts text between upper, lower, sentence case. etc
23. What is the main purpose of social media?
- To connect and interact with other online through platforms for sharing information and content.
সোশ্যাল মিডিয়ার মূল উদ্দেশ্য হলো মানুষকে সংযুক্ত করা, তথ্য আদান-প্রদান করা এবং লেখা, ছবি, ভিডিও ও বার্তার মাধ্যমে যোগাযোগ করা।
24. What is a networking device?
- A device used to connect computers and other devices in a network, such as a router or switch.
একটি ডিভাইস যা কম্পিউটার এবং নেটওয়ার্কের অন্যান্য ডিভাইস, যেমন রাউটার বা সুইচ, সংযোগ করতে ব্যবহৃত হয়।
25. Name two components you must select based on customer needs.
- Motherboard, Processor, HDD/SSD and Power supply
26. What is the purpose of understanding operating system components and their functionality?
- To Troubleshoot issues and configure the OS effectively
সমস্যা সমাধান এবং কার্যকরভাবে OS কনফিগার করা
27. What does IP stand for in the context of networking?
- IP stands for **Internet Protocol**. It is used to identify devices on a network and route data between them.
IP এর পূর্ণরূপ হলো Internet Protocol। এটি একটি নেটওয়ার্কে ডিভাইস চিহ্নিত করতে এবং তাদের মধ্যে ডেটা আদান-প্রদানে ব্যবহৃত হয়
28. What needs to be done after installing application software?
- Configure the software as per requirement and check its functionality
প্রয়োজন অনুসারে সফটওয়্যারটি কনফিগার করা এবং এর কার্যকারিতা পরীক্ষা করা।
29. Name one tool for OS backup?
- Windows backup tool- System Image Backup (Norton, acronis, EASE US, AOMEI, Minitool)
30. Why is it important to interview the appropriate person about the problem?
- To Gather information and understand the issue from the user's perspective.
তথ্য সংগ্রহ করা এবং ব্যবহারকারীর দৃষ্টিকোণ থেকে সমস্যাটি বোঝা।

(8)

1. Which is an example of a visual workplace sign?
a) Agenda b) Minutes of meeting c) Report **d) Fire exit sign**
2. Which of the Following is a courteous way to communicate in the workplace?
a) Interrupting others b) Ignoring Feedback **c) Active listening** d) Yelling during meeting
3. What is the AVERAGE function do?
a) Multiplies values **b) Finds the mean of selected numbers**
c) Finds the middle number d) Adds values
4. What is the Function of a modem?
a) Google Docs **b) Connect to the internet** c) play Video d) Download images
5. What is the Main function of a search engine?
a) To send emails b) To manipulate files
c) Share videos **d) To find information on the internet**
6. Which Of the Following is a core concept interpreted in IT support service?
a) Programming Skills b) Agricultural techniques
c) Software Development Skill **d) Problem- Solving methods in IT systems.**
7. Which social media platform is mainly used for video sharing?
a) Facebook **b) Youtube** c) Twitter d) LinkedIn
8. Which of these is considered a peripheral device?
a) SSD/HDD b) CPU **c) Mouse** d) RAM
9. Which of the following is a type of storage device?
a) **Solid-State Drive** b) Network interface card c) Sound Card d) Power Supply
10. What is the purpose of GRAPHICS CARD?
a) To process sound b) To connect to a network
c) to process and output images to a display d) To provides power to the computer
11. Understanding the basic components and functionality is:
a) An unnecessary skill b) Graphic Design
c) Advanced Programming **d) General knowledge**
12. What is typicality after the operating system?
a) User files **b) required drivers** c) More RAM d) Serial number
13. A unique numerical local assigned to each device on a networking its:
a) **IP Address** b) MAC Address c) Host number d) Serial Number
14. What is the primary purpose of documenting a network address plan?
a) To increase network performance
b) To reduce network downtime and increase network performance
c) To make the network more secure
d) To provide guidelines for setting up new devices on the network
15. Which of the following is an example of utility software?
a) **Anti-virus** b) spreadsheet program c) Word Processor d) Video editing software
16. Why are user requirements documented before collecting software?
a) To decide the computer color **b) To ensure the correct software is selected**
c) To find a new job d) To order food
17. The Location where a backup will be stored is called the:
a) Source **b) Destination folder** c) Origin d) Target
18. Which of the following is a tool for OS backup?
a) Web browser **b) System provided tool** c) Text editor d) Spreadsheet software
19. After identifying the cause of a fault, you should:
a) Immediately replace the component b) Install new software
c) Restart the computer repeatedly **d) Perform testing to ensure the cause**
20. The documented troubleshooting status is reported to the:
a) **User** b) Authority c) Software vendor d) Hardware manufacturer

21. What is the purpose of the a progress report?
Ans: To provide updates on the status of a project, showing what has been completed, what is in progress, and any issues faced.
কোন প্রকল্পের অবস্থা সম্পর্কে আপডেট প্রদান করা, কী সম্পন্ন হয়েছে, কী চলছে এবং কোন সমস্যার সম্মুখীন হচ্ছে তা দেখানো।
22. What is the importance of using charts in data visualization?
Ans: Charts help present complex data clearly and make it easier to identify trends, patterns, and comparisons.
চার্ট জটিল তথ্য স্পষ্টভাবে উপস্থাপন করতে সাহায্য করে এবং প্রবণতা, ধরণ এবং তুলনা সনাক্ত করা সহজ করে তোলে।
23. What web- based service would you use to hold an online video conference?
Ans: Zoom, Google Meet, or Microsoft Teams.
24. What is an IT Device?
Ans: An electronic device used to input, process, store, or output data, such as a computer, printer, or router.
25. Mention one function of an operating system.
Ans: Managing hardware and software resources (e.g., memory management or file management).
26. What are the two primary boot modes in computer systems?
Ans: Legacy BIOS and UEFI (Unified Extensible Firmware Interface).
27. Why is it important to document network settings and configuration?
Ans: To ensure easy troubleshooting, maintenance, and consistency when setting up new devices or restoring systems.
নতুন ডিভাইস স্থাপন বা সিস্টেম পুনরুদ্ধার করার সময় সহজ সমস্যা সমাধান, রক্ষণাবেক্ষণ এবং ধারাবাহিকতা নিশ্চিত করতে।
28. Configure the software as per requirements and check its functionality
Ans: Install and set up the software according to user needs, then test it to confirm that it works correctly.
ব্যবহারকারীর চাহিদা অনুযায়ী সফটওয়্যারটি ইনস্টল এবং সেট আপ করুন, তারপর এটি সঠিকভাবে কাজ করছে কিনা তা নিশ্চিত করার জন্য এটি পরীক্ষা করুন।
29. What is the Backup testing?
Ans: The process of verifying that backup files can be successfully restored and used in case of data loss.
ব্যাকআপ ফাইলগুলি সফলভাবে পুনরুদ্ধার করা যায় এবং ডেটা হারিয়ে গেলে ব্যবহার করা যায় তা যাচাই করার প্রক্রিয়া।
30. To whom is the documented troubleshooting status reported?
Ans: The user or authorized supervisor responsible for the system.
সিস্টেমের জন্য দায়ী ব্যবহারকারী বা অনুমোদিত তত্ত্বাবধায়ক।

(9)

1. Who is responsible for interpreting the workplace code of conduct?
a) Only HR b. Only Supervisors c) Outsiders **d. Each employee**
2. Which web browser is developed by Microsoft?
a. Microsoft Edge b. Mozilla Firefox c. Google Chrome d. Opera
3. Before turning on the computer, power cords should be:
a. properly and safely connected b. implementing follow-up
c. Delivering solutions d. Evaluating support solutions
4. identifying the specific problem a user is facing initial step in:
a. identifying customer issues b. implementing follow-up
c. delivering solutions d. evaluating support solutions
5. which of the following is a core concept interpreted in IT support service?
a. programming skills **b. problem-solving methods in IT systems**
c. software development skill d. Agricultural techniques
6. what type of storage device is known for having no moving parts and faster data access times?
a. HDD(hard disk drive) b. FDD(floppy disk drive)
c. CD-ROM drive **d. SSD(solid state drive)**
7. what does RAM provide for the computer?
a. long-term storage **b. temporary storage for data the CPU is actively using**
c. Power supply d. Network connectivity
8. A common boot media used for OS installation is:
a. USB boot disk b. solid-state drive c. hard disk drive d. network cable
9. what should you do before installing or upgrading hardware/software?
a. restart the PC b. Plug in multiple USBs
c. Read the instructions manual d. close all running apps
10. creating user accounts and setting passwords is part of:
a. hardware installation b. driver installation
c. user management d. BIOS configuration
11. which of these is a network connectivity tool?
a. hammer b. measuring tape c. Paint brush **d. screwdriver set**
12. what is the primary use of a RJ-45 connector?
a. Transmitting electrical power b. connecting telephone lines
c. transmitting internet signals **d. connecting ethernet cables**
13. collecting and documenting organizational requirements for a network setup helps to:
a. make the network slower **b. understand needs and goals for the network design**
c. increase the cost of the network d. delete existing data
14. what is the final step after installing and configuring software?
a. shutting down the computer b. changing the password
c. Opening the user requirements **d. checking the functionality of the installed software**
15. taking a necessary backup before installing software is done to:
a. Make the computer faster **b. protect existing data**
c. change the screen resolution d. install more RAM
16. which of these is a method for creating an email backup plan ?
a. Downloading a new mail client b. Replying all emails
c. deleting old emails **d. using the import/export function**
17. a backup plan is prepared to define:
a. the user's password **b. what to backup, where to store it, and how often**
c. the computer's serial number d. the weather forecast
18. restoring lost, corrupted, or inaccessible data from a backup is known as:
a. Data archiving b. data compression **c. Data recovery** d. Data migration
19. problems can be detected by:
a. ignoring the computer b. playing games
c. changing the desktop background **d. physical observation**

20. the first step in preparing for troubleshooting is:
 - a. fixing the problem
 - b. updating documents
 - c. selecting and collecting required tools and equipment**
 - d. identifying the cause of fault
21. what type of chart is ideal for comparing data values side by side?
bar chart
22. what is the purpose of web-based services like google calendar?
to schedule and organize events online.
23. How can speaking skills improve communication?
by making messages clear and understandable
24. what is a cloud service?
Providing IT resources and services over the internet, often on a pay-as-you-go basis.
25. what is the function CMOS battery?
To Power the CMOS chip, which stores the system's BIOS setting and the real-time clock, even when the computer is off.
26. what does MBR stand for in the context of partition types?
Master Boot Record
27. what is backup testing?
Verifying that backups are successful and can be reliably restored.
28. what is the difference between IPv4 and IPv6?
They are different version of the Internet Protocol with different addressing schemes and capacities. IPv6 uses a larger address space.
29. What needs to be done after installing application software?
configure the software as per requirement and check its functionality.
30. Why is it important to interview the appropriate person about the problem?
to gather information and understand the issue from the user's perspective.

1. **What should be respected and maintained at work regarding sensitive matters?**
a) Confidentiality b) Privacy c) Rumors d) Majority
2. **Which function adds a group of numbers in Excel?**
a) AVERAGE b) SUM c) MIN d) MAX
3. **Which device helps convert hard copy to soft copy?**
a) Monitor b) Printer c) Scanner d) Modem
4. **How can an email be manipulated?**
a) Download, Upload, Share, Edit
b) Destroy, Hack, Spam, Clone
c) Delete, Copy, Move, Sort, Archive
d) None of the above
5. **Which social media platform is mainly used for video sharing?**
a) Facebook b) YouTube c) Twitter d) LinkedIn
6. **A mouse, keyboard, and monitor are examples of a computer**
a) Hardware b) Out device c) Input device d) Peripherals device
7. **Which type of support deals with issues related to physical computer components?**
a) Software support b) Network support c) Hardware support d) Application support
8. **Why is it important to use ESD protection during PC assembly?**
a) Prevent electric shock to components b) Protect software
c) Prevent overheating d) Clean the motherboard
9. **Which component stores the BIOS settings and keeps the real-time clock running?**
a) Processor b) RAM c) CMOS Battery d) Graphics Card
10. **Which of the following is NOT a factor in determining CPU performance?**
a) Clock speed b) Number of cores c) Size of the processor d) Cache memory
11. **After starting the OS installation, the next step is _____.**
a) Shut down the computer b) Remove the hard drive
c) Disconnect the power cable d) Follow the OS setup instructions
12. **Understanding the basic components and functionality of a personal computer is considered**
a) An unnecessary skill b) Basic knowledge c) Advanced programming d) Graphic design
13. **What is the primary reason for the adoption of IPv6 over IPv4?**
a) Lower latency b) Greater compatibility with legacy systems
c) Larger address space d) Reduced complexity
14. **Documenting network settings and configuration is important for**
a) Making the network faster b) Future maintenance purposes
c) Increasing security vulnerabilities d) Reducing the number of devices
15. **After installing application software, you should**
a) Immediately uninstall it b) Buy a new computer
c) Delete the installation file d) Configure it as per requirement and check functionality
16. **Which of these is a critical aspect of competency in this topic?**
a) Painting the computer case b) Installing and configuring application software
c) Building a website d) Playing video games
17. **The design and structure of an operating system is its**
a) OS architecture b) File system c) User interface d) Device driver
18. **The steps taken to recover data from a backup are called the:**
a) Backup procedure b) Installation procedure c) Restore procedure d) Configuration procedure
19. **When identifying the possible cause of a fault, you might consult:**
a) A random person on the street b) A celebrity
c) A pet d) The appropriate person (e.g., network responsible, management)

20. **After identifying the cause of a fault, you should:**
- a) Immediately replace the component
 - b) **Perform testing to ensure the cause**
 - c) Restart the computer repeatedly
 - d) Install new software
21. **Why are brochures used in the workplace?**
Answer: To provide promotional or informational material.
22. **What does "Change Case" do in MS Word?**
Answer: It converts text between upper, lower, sentence case, etc.
23. **Give an example of manipulating emails.**
Answer: Deleting, forwarding, replying, or archiving emails.
24. **What does SATA stand for?**
Answer: Serial Advanced Technology Attachment.
25. **What does GPT stand for in the context of partition types?**
Answer: GUID Partition Table.
26. **What is a networking device?**
Answer: A device used to connect computers and other devices in a network, such as a router or switch.
27. **What are the two main types of transmission media?**
Answer: Wired and Wireless.
28. **What needs to be done after installing application software?**
Answer: Configure the software as per requirement and check its functionality.
29. **What type of data is backed up in "user data backup"?**
Answer: Files and folders created or modified by the user.
30. **What is done after repairing or replacing faulty hardware equipment or software components?**
Answer: The repaired/replaced equipment is tested, and the performance of the PC is tested.

1. Who is responsible for interpreting the workplace code of conduct?
a) Only HR b. Only Supervisors c) Outsiders **d. Each employee**
2. Which function adds a group of number in Excel?
a) AVERAGE **b) SUM** c) MIN d) MAX
3. What is the primary function of a search engine?
a. To find information b. To find on this application
c. To search information, Google chrome d. To find information one the computer
4. Which of the following is a core concept interpreted in IT Support Service?
a) Programming Skills b) Agricultural techniques
c) Software Development Skill **d) Problem- Solving methods in IT systems.**
5. What does GPT stand for in the context of disk partitioning?
a) GUID Partition Table b) General Partition Table
c) GUIDED Partition Table d) Graphics Partition Table
6. What is the function of the PCIe slots on a motherboard?
c. To install expansion cards such as network cards, and sound cards
7. The component that serves as the central hub connection all for connecting all other components in a computer is the
A. Processor B. RAM C. Graphics Card **D. Motherboard**
8. What ensures smooth interaction between hardware and software in a PC?
d. Compatible Drivers and OS
9. Modifying the boot sequence is necessary to:
A. Increase the computer speed
B. Prioritize the boot media for installation
C. Increase drive speed
D. Install software application
10. What should be done with damaged hardware parts?
a. Reuse them b. Store Them **c. Trash them safely Following environmental policies** d. Sell them online
11. A plan for assigning IP Addresses to devices on a network is known as?
a. IP Addressing Scheme b. Network Topology c. Network Protocol d. Transmission Media
12. What Protocol is commonly used for automatically assigning IP addresses to client machines?
a. DNS **b. DHCP** c. TCP d. SMTP
13. Which version of the internet protocol uses a larger address space?
a. IPv 4 **b. IPv 6** c. IPX d. NetBEUI
14. What is the final step after installing and configuring software?
a. Shutting down the computer b. Changing the password
c. Opening the user requirements **d. checking the functionality of the installed software**
15. Activating a software license is typically required to:
a. Make the software look better **b. Legally use the correct software is selected**
c. increase the computer's storage d. connect to the internet
16. Why are user requirements documented before collecting software?
a. To decide the computer color **b. to ensure the correct software is selected**
c. To find a new job d. To order food
17. A structure on a disk that describes how the disk is divided into partitions is the:
a. Partition Table b. Boot sector c. File System d. MBR
18. A backup that runs automatically at predetermined times is a:
a. Manual backup **b. Scheduled backup** c. Ignored d. Shared on social Media
19. Recovery planning is important to ensure:
a. The computer has enough storage **b. Data can be quickly and effectively restored in case of data loss**
c. Software licenses are valid d. The network connotation
20. Identified problems should be
a. documented b. Deleted c. ignored d. Shared on social media

21. What is an operational manual?
A document containing instructions on how to operate machines or systems.
অপারেশনাল ম্যানুয়াল হলো একটি নথি যা নির্দেশ দেয় কীভাবে একটি সিস্টেম, ডিভাইস বা সফটওয়্যার সঠিকভাবে ও নিরাপদে ব্যবহার, পরিচালনা বা রক্ষণাবেক্ষণ করতে হয়।
22. How do you rename a file in windows?
Right-click the file and select “Rename”, or press “F2”
23. What web-based service would you use to hold an online video conference?
Google Meet or Zoom
24. Mention one function of an operating system.
It Manages hardware and software resources.
25. What is an IP Addressing Scheme?
A Plan for Assigning IP addresses to devices on a network.
26. Name one type of backup solution.
Full backup
27. What is software support?
Providing Assistance and solutions for problem related to computer programs and applications.
কম্পিউটার প্রোগ্রাম এবং অ্যাপ্লিকেশন সম্পর্কিত সমস্যার জন্য সহায়তা এবং সমাধান প্রদান।
28. What is the purpose of understanding operating system components and there functionality?
To Troubleshoot issues and configure the OS effectively.
সমস্যা সমাধান এবং কার্যকরভাবে OS কনফিগার করতে।
29. What is the final step after installing and configuring any type of software (application, utility, security)?
Check the functionality of the installed software.
30. What is done after repairing or replacing faulty hardware equipment or software components?
The Repaired/replaced equipment is tested and the performance of the PC is Tested.
মেরামত/প্রতিস্থাপিত সরঞ্জাম পরীক্ষা করা হয়, এবং পিসির কর্মক্ষমতা পরীক্ষা করা হয়।

(12)

1. What is the main purpose of web-based services like Google Drive or Calendar?
a) To develop software b) To browse the internet anonymously
c) To store and organize data online d) To play online games
2. How can an email be manipulated?
a) Delete, Copy, Move, Sort, Archive b) Destroy, Hack, Spam, Clone
c) Download Upload, Share, Edit d) None of the above
3. Assisting users experiencing technical difficulties is a key aspect of:
a) Customer Relationship Billed up b) Manufacturing
c) Financial analysis in an IT system **d) Customer support service in an IT system**
4. A device used to connect multiple computers in a network is a:
a) LAN Port **b) Router** c) PC to PC d) Anu to Router
5. Which part of the computer supplies power to all components?
a) CPU **b) Power Supply Unit** c) RAM d) Motherboard
6. What does ESD stand for in the context of ESD tools?
a) Electronic System Design **b) Electrostatic Discharge**
c) Electrical Safety Device d) Energy Saving Device
7. What should be done with damaged hardware parts?
a) Trash them safely following environmental policies b) Store them
c) Reuse them d) Sell them online
8. What is the main function of the motherboard?
a) Stores data b) Supplies power **c) Connects all computer components** d) Displays output
9. What is the primary function of a router in a network?
a) Connects multiple devices in a Local Area Network (LAN)
b) Filters and forwards data packets between networks
c) Provides centralized storage for Local Area Network (LAN)
d) Manages user access to network resources
10. What does SOHO stand for?
a) system Operational and Hardware Organization **b) Small Office Home Office**
c) Software and Hardware Optimization d) Sours Online Home Operation
11. Reviewing network documentation during troubleshooting helps to:
a) Install new software **b) Understand the network's configuration and history**
c) Change the computer's color d) Play online games
12. The documented troubleshooting status is reported to the:
a) User b) Hardware manufacturer c) Software vendor **d) Authority**
13. After installing application software, you should:
a) immediately uninstall it b) Buy a new computer
c) Delete the installation file **d) Configure it as per requirement and check functionality**
14. Taking a necessary backup before installing software is done to;
a) Make the computer faster **b) Protect existing data**
c) Change the screen resolution d) Install more RAM
15. A backup that runs automatically at predetermined times is a:
a) Manual backup b) Incremental backup c) Full backup **d) Scheduled backup**
16. Which of these is a type of target for backup storage?
a) Printer b) Scanner **c) Cloud storage** d) Monitor
17. After identifying the cause of a fault, you should:
a) immediately replace the component **b) Perform testing to ensure the cause**
c) Restart the computer repeatedly d) Install new software
18. What is a basic requirement of workplace ethics?
a) Keeping promises b) Avoiding responsibilities c) Breaking confidentiality d) Complaining
19. The taskbar shows:
a) Recent documents b) Footnotes c) Page number **d) Icons for open applications**
20. Which tool is used to adjust spacing between lines in a paragraph?
a) Border b) Alignment **c) Line and Paragraph Spacing** d) Header

21. **What is the purpose of 'sorting' emails or files?**
Answer: To organize them based on criteria like date, sender, or subject.
22. **Why is identifying customer issues important in IT support?**
Answer: To understand the specific problem the user is facing and provide the correct solution.
23. **What does RAM stand for?**
Answer: Random Access Memory.
24. **Why is basic knowledge of the operating system important for installation?**
Answer: To understand the installation process and configuration options.
25. **What is backup testing?**
Answer: Verifying that backups are successful and can be reliably restored.
26. **What is a network protocol?**
Answer: A network protocol is a set of rules that govern how data is transmitted between devices in a network.
27. **How can we legally use the software and unlock its full features?**
Answer: By purchasing an official license or subscription from the software provider.
28. **Name one way to detect problems according to the document.**
Answer: Through physical observation or diagnostic tools.
29. **How should meetings be attended?**
Answer: On time and following procedures.
30. **What is filtering used for in Excel?**
Answer: To display specific data that meets a condition

1. What is the purpose of 'sorting' emails or files?
The purpose of 'sorting' emails or files is to organize them in a specific order (such as by date, name, size, or sender) so that they can be easily found, managed, and accessed.
2. Why is identifying customer issues important in IT support?
because it helps the support team understand the exact problem the user is facing. This allows them to provide the right solution quickly and efficiently,
3. How can speaking skills improve communication?
Speaking skills improve communication by helping a person express their thoughts clearly, confidently, and respectfully.
4. What is a cloud service?
Cloud service refers to services (like storage, software, or computing power) delivered over the internet.
5. What is the function of the CMOS battery?
The CMOS battery powers the CMOS chip, which stores important system information like date, time, and BIOS settings even when the computer is turned off.
6. What does MBR stand for in the context of partition types?
MBR (Master Boot Record) হলো হার্ড ড্রাইভ বা স্টোরেজ ডিভাইসের শুরুতে থাকা একটি বিশেষ সেক্টর, যেখানে ডিভাইসের পার্টিশন সম্পর্কিত তথ্য ও কম্পিউটার চালু করার প্রাথমিক নির্দেশনা থাকে।
7. What is backup testing?
Backup Testing হলো একটি প্রক্রিয়া যেখানে নেওয়া ব্যাকআপ ডেটা তিকমতো কাজ করে কি না, তা যাচাই করা হয়।
8. What is the difference between IPv4 and IPv6?
IPv4: 32-bit, 4.3 billion addresses , IPv6: 128-bit, Trillions of addresses
৯. What needs to be done after installing application software?
Configure the software as per requirement and check its functionality
প্রয়োজন অনুসারে সফ্টওয়্যারটি কনফিগার করা এবং এর কার্যকারিতা পরীক্ষা করা।
10. Why is it important to interview the appropriate person about the problem?
Importance of interviewing appropriate person: Helps understand the problem from the user's perspective and ensures correct troubleshooting.
উপযুক্ত ব্যক্তির সাক্ষাৎকার নেওয়ার গুরুত্ব: ব্যবহারকারীর দৃষ্টিকোণ থেকে সমস্যাটি বুঝতে সাহায্য করে এবং সঠিক সমস্যা সমাধান নিশ্চিত করে।
